EDUCATION

California State University, Long Beach | **Long Beach, CA**
Major: Computer Science | **B.S. Computer Science**
GPA: 3.4/4.0   **Projected Graduation: May 2026**

TECHNICAL SKILLS

Programming Languages: Python, Java, JavaScript, C++, C#, HTML/CSS
Frameworks/Libraries: React, Next.js, Node.js, Express.js, EJS, Flask, Tailwind, jQuery, TensorFlow, scikit-learn
Operating Systems: Windows XP/Vista/7/8/10 and Mac OS X

EXPERIENCE

Association for Computing Machinery   **August 2024 - Present**
Role: Web Developer
- Responsible for the development and management of ACM's websites, including the promotion of CSULB's BeachHacks.
- Design and implement user-friendly features such as event sign-up forms, ensuring an engaging digital experience for ACM members and event participants.

XR Engineering Operations Club   **September 2023 - Present**
Role: Project Lead
- Led a team to develop an **AR cooking simulator game**, managing project timelines, resources, and technical challenges.
- Collaborated with cross-functional teams to integrate VR/AR technologies into the project, enhancing user experience.

PROJECTS

Lingo AI | Hackathon AI Project   **June 2024**
- Developed an AI-powered language trainer to help non-native English speakers improve their language skills using **Hume AI** for emotion analysis and **OpenAI API**s for real-time feedback on grammar and pronunciation.
- Implemented a robust tech stack including **Next.js** for server-rendered **React**, **Flask** for backend services, **Tailwind CSS** for styling, and **Firebase** for backend services, ensuring a seamless and responsive user experience.

Automatic Schedule Generator | Personal Project   **October 2023**
- Implemented **BeautifulSoup** for data extraction from CSULB's course catalog webpage. Utilized **Python's SQLite** to create a structured database housing course details.
- Empowered users to generate conflict-free course schedules in the terminal, offering detailed insights into course types, schedules, locations, and instructors.

Tech News Blog | Personal Project   **August 2024**
- Developed a blog application to serve the CSULB community, using **Node.js**, **Express.js**, and **EJS**.
- Implemented features allowing users to create, edit, and delete posts with password protection and explore categorized content by subjects.
